

Power and Communication beyond borders

Beginning in June 2010, UnatSolar will offer Inmarsat's new global handheld, the IsatPhone Pro.

The IsatPhone Pro will take advantage of the world's most advanced satellite communications network to provide exceptional quality and reliability.

The IsatPhone Pro is designed for professionals in a wide range of sectors including government and military, energy, construction, media and first response. The handheld has been designed with the end user in mind and is the first phone to be designed specifically for Inmarsat's I-4 satellite network.

The phone will feature:

- Bluetooth capability
- Voicemail
- Text and email messaging
- Location data

IsatPhone Pro from UnatSolar

Inmarsat's Revolutionary Global Handheld to be Released in June, 2010

In June 2010, UnatSolar will launch Inmarsat's first global handheld designed specifically for the I-4 satellite system, the revolutionary IsatPhone Pro.

IsatPhone Pro is designed for a wide range of users including professionals in sectors such as government and military, media, oil and gas, construction and first response. IsatPhone Pro will provide the ultimate combination of a robust handset that is easy to use, with long battery life, a reliable network connection with clear voice quality and global coverage. The new location data feature will be a key tool in helping to ensure the safety of remote personnel who will be able to look up and send their position via a text message.

Features

Inmarsat is committed to supporting the SPS base versions of IsatPhone, LandPhone and FleetPhone until at least 2011. Despite this commitment, SPS terminals are no longer being produced and SPS SIMs will not be supported in IsatPhone Pro handsets and vice versa.

*The information in this FactSheet is subject to change prior to actual launch.

UnatSolar serves international governments, military, first responders, NGOs, industrial, oil-gas-mining industry, maritime and media across the world with communication and power
